47. "A Brief History of the Drug War." In 2016, a 22-year-old interview was published in Harper's Magazine featuring John Ehrlichman, Nixon's Assistant to the President for Domestic Affairs. In the 1994 interview, Ehrlichman admitted, "[B]y getting the public to associate the hippies with marijuana and the blacks with heroin, and then criminalizing both heavily, we could disrupt those communities. We could arrest their leaders, raid their homes, break up their meetings, and vilify them night after night on the evening news. Did we know we were lying about the drugs? Of course we did."

81. Kathryn M. Nowotny, Richard G. Rogers, and Jason D. Boardman, "Racial Disparities in Health Conditions Among Prisoners Compared With the General Population," *Population Health* 3 (2017): 487-496, doi: 10.1016/j.ssmph.2017.05.011. 2.9% of black men and 1.1% of white men suffer from kidney problems in the general population, but 3.9% of black males and 7.7% of white males in prisoners report kidney problems. There is no black/white difference in obesity in the general population, but black incarcerated men have a 51% higher chance of being obese than white incarcerated men. The general population shows no significant disparity between blacks and

whites for STIs, but black prisoners have nearly three times the odds of reporting an STI than white prisoners. 14% of black women report having an STI as compared with 10.8% of white women. In prisons, however, 20.1% of black women report having an STI (6.1% increase) as compared to just 13.4% of white women (2.6% increase).
